Office Action Summary

Art Unit: 1712

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heider in view of Brauer. The rejection is applied as in the previous Office action. Applicant argues that the references do not suggest the use of an amorphous polyester polyol that is the reaction product of neopentyl glycol, hexanediol and at least one of phthalic anhydride or phthalic acid. While Heider does not exemplify an amorphous polyester polyol comprising the reaction product of phthalic acid/anhydride, neopentyl glycol and hexane diol, amorphous polyester polyols comprising the reaction product of phthalic acid/anhydride and glycol mixtures that include neopentyl glycol are exemplified. It would have been obvious to use similar amorphous polyester polyol comprising the reaction produce of phthalic acid/anhydride and glycol mixtures that include neopentyl glycol, such as commercially available Agent™ 2227-100, as the amorphous polyester polyol in the polyol component when preparing the polyurethane prepolymer of Heider.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
